HIGHWAY SERVICE DISCONNECT

HWYSD

This family of Highway Service Disconnect Panels can be installed on any steel pole. Its primary function is a main disconnect for street lighting or power distribution and is useful when the service panel cannot be placed on the same pole as the supply. The padlockable flip up cover enables easy access. A Type 3R rating and stainless steel construction offer additional protection.

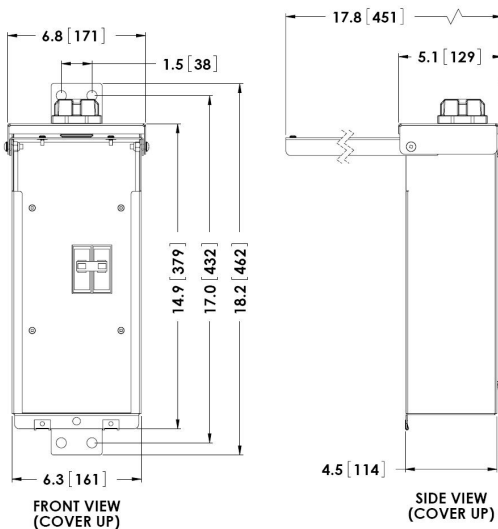

Features/Specifications:

- 304 stainless steel construction
- Service entrance rated
- CSA Type 3R rated
- Overhead service only
- Lock-out tab on main breaker
- Flip up padlockable cover
- Mounting hardware and conduit fittings included
- Bondable neutral block
- Pole bracket designed for bolt or band-on installation
- 120/240 VAC 1 phase
- 10 kAIC rated
- Listed on BC MOT&I recognized products list
- 30A to 100A main breaker

Optional Components:

- Up to 22 kAIC rated breakers
- Aluminum construction
